Kioxia Holdings Corporation

July 31, 2026

# Disclaimer

Forward-looking statements included in this presentation are prepared based on our expectations and projections in light of the information currently available to us, which involve various risks and uncertainties (including, but not limited to, economic trends, market demand and the highly competitive semiconductor industry). Such risks and uncertainties may cause our actual results to be materially different from any future results expressed or implied by these forward-looking statements. We undertake no obligation to update any forward-looking statements included herein.

The information and projections regarding the flash memory industry included in this presentation are our assumptions and projections derived from information currently available to us. Whilst this presentation is provided in good faith, it does not purport to be comprehensive and has not been independently verified. We make no representations with respect to such information and projections.

This presentation includes Non-GAAP measures we use internally in making decisions. Non-GAAP measures exclude non-recurring items and other specific items from IFRS-based figures to more easily evaluate the Group's fundamental profitability. We believe that disclosing non-GAAP measures makes it easier for stakeholders to compare the Group's performance with that of other companies in the same industry and against previous fiscal years. Non-GAAP measures are used internally by us and are not accounting items based on IFRS, and have not been audited or reviewed by auditors. Therefore, such non-GAAP measures may not accurately reflect the Group's financial condition or operating results. "Non-recurring items" are temporary gains and losses that we consider should be excluded for non-GAAP measures, including the impact of purchase price allocation (PPA) arising from mergers and acquisitions, provisions for losses on litigation, and the impact of significant changes to tax policies. "Other specific items" are gains and losses that we consider difficult to compare with other companies due to factors such as different accounting standards, including costs for the fiscal year recorded under the Group's continuous service and performance-linked stock-based remuneration plans.

This presentation includes internal measures which our management relies upon in making decisions (the "Non-GAAP Financial Measures") that differ from financial measures prepared in accordance with International Financial Reporting Standards ("IFRS"). The Non-GAAP Financial Measures, which are IFRS measures plus adjustments made for non-recurring items, have not been audited or reviewed by auditors. Therefore, such Non-GAAP Financial Measures may not accurately reflect our financial condition or operating results.

This presentation was prepared to provide information on our consolidated financial results for the first quarter of fiscal year ending March 31, 2027 and does not constitute, or form a part of, any offer or solicitation to purchase or subscribe for securities in any jurisdiction.

# Overview of the NAND Market and Enhancement of Our Production Capability

# NAND Market Outlook

## NAND market growth continues to be fueled by AI-driven demand in DC/Enterprise

### DC/Enterprise

- ✓ **Agentic AI applications** are emerging as a primary growth catalyst
- ✓ Traditional server NAND demand is also benefiting from the growing adoption of agentic AI applications

### Smartphone/PC

- ✓ **Smartphones**
  - Units: down for low-priced models, flat for high-priced models
  - NAND demand: flat vs. CY25
- ✓ **PCs**
  - Units: down on higher BOM costs
  - NAND demand: slight decline vs. CY25

### NAND Market Outlook

- ✓ **CY26:** Bit growth rate in high-teens %

Expecting Kioxia's CY26 shipment bit growth to be in line with market outlook

- ✓ **CY27:** Demand anticipated to exceed supply.

# Enhancement of Production Capability to Support Growing Demand in the AI Era

## Ongoing Expansion of Manufacturing Infrastructure for AI Demand

1. Cost of Sales is based on Non-GAAP. From FY25Q4, year-end calculations is based on 90 days, same as the quarterly calculations.

For the method of calculating Non-GAAP Cost of Sales, please refer to page 28 of this document.

2. Foreign currency-denominated bonds are converted at the swap rate for those under a swap agreement

3. Net D/E ratio: (Bonds and borrowings - Cash and cash equivalents) / Total equity attributable to owners of parent
